| Returned to applicant for correction  |
| Corrected application filed   |
| Map filed   |
| · · · · · · · · · · · · · · · · · · ·   |
| The applicant Larry Lewis   |
| 3955 Swenson #37 Las Vegas Street and No. or P.O. Box No. City or Town  |
| Nevada 89109 , hereby make sapplication for permission to appropriate the public state and Zip Code No.   |
| waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a  |
| copartnership or association, give names of members.)   |
|   |
|   |
| 1. The source of the proposed appropriation is See Attachment A Source: Present and future  Name of stream, lake, spring, underground or other source                       |
| Sewage and sludge effluent waters of the City of Las Vegas Waste Water Treatment  |
| 2. The amount of water applied for is See Attachment B 421.86689 cfs second-feet  One second-foot equals 448.83 gals. per min.  |
| One second-foot equals 448.83 gals. per min.  (a) If stored in reservoir give number of acre-feet   |
| , pranty  |
| 3. The water to be used for Pollution Abatement/Power Production See Attachment C  Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use. |
| 4. If use is for:   |
| (a) Irrigation, state number of acres to be irrigated. See Attachment C   |
| (b) Stockwater, state number and kinds of animals to be watered N.A. See Attachment C   |
| (c) Other use (describe fully under "No. 12. Remarks") Pollution Abatement/Power Production See Attachment C  |
| (d) Power:  |
| (1) Horsepower developed. See Attachment C Theoritical 1909.25  See Attachment E R 64 E, T 21 S, S 1-18   |
| (2) Point of return of water to stream  |
| 5. The water is to be diverted from its source at the following point. See Attachment D.  Describe as being within a 40-acre subdivision of public                          |
| Describe as being within a 40-acre subdivision of public  |
| survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated.  |
| Car Attachment F  |
| 6. Place of use See Attachment E  Describe by legal subdivision. If on unsurveyed land, it should be so stated.   |
|   |
|   |
| ***************************************   |
|   |
| 7. Use will begin about Jan. 1 and end about Dec. 31 , of each year.  |
| 8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and The proposed works are hypolon canals, Siphon                |
| specifications of your diversion or storage works.) pipes, generators, dispersement pipes, and ot   |
| future structures and devices that are found appropriate to abate pollution.  |
| 9. Estimated cost of works. See Attachemtn F (\$4,250,000 of 7,500,000 plus total)  |

| 10.   | Estimated time required to construct works is three to five years.  If well completed, describe works.  |
|-------|---|
| 11.   | Estimated time required to complete the application of water to beneficial use is three to five years.  |
| 12.   | Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.                  |
|       | See Attachment C  |
|       |   |
|       |   |

## ATTACHMENT A APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA BY LARRY G. LEWIS, 3955 SVENSON, LAS VEGAS, NEVADA 89109

#### SOURCE: PRESENT AND FUTURE SEVAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

All water flowing, now or in the future, from and/or in the City of Las Vegas Vastewater Treatment Plant and all associated or interconnected facilities.

This includes but is not limited to all waters, dispersed for evaporation, flowing within the clorination channel and over the clorination weirs not diverted, not detained, not retained, not benificially used, or needed for wetlands maintainance by any application or appropriation holders of the Las Vegas Waste Water Treatment Plant waters, and includes any water from future additions, modifications, substitute, and replacement facilities of the forgoing treatment plants.

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

BY LARRY G. LEWIS, 3955 SWENSON, LAS VEGAS, NEVADA 89109

SOURCE: PRESENT AND FUTURE SEVAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

THE AMOUNT OF WATER APPLIED FOR IS 421.86689 CFS AS LISTED BELOW:

- A) 101.73001 cfs of effluent water with a nonconsumption pollution abatement/power production priority effective at the time the United States Department of Interior, Bureau of Reclamation, requires the water be returned for credit for the Southern Nevada Water Project (Griffin Project) otherwise the effluent water may be used for the alternate methods of pollution abatement and benificial use.
- B) 37.648197 cfs of effluent water with a nonconsumption pollution abatement/power production priority effective at the time the United States Department of Interior, Bureau of Reclamation, requires the water be returned for credit for the Southern Nevada Water Project (Griffin Project), in a Colorado River water shortage situation, otherwise the effluent water may be used for the atlernate methods of pollution abatement or benificial use.
- C) 282.48869 cfs of nonpriority use effluent water to be used intially and primarly for the pollution abatement/power production but may be use for other pollution abatement benificial uses without consideration of return flow credits.

# ATTACHMENT C APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA BY LARRY G. LEWIS, 3955 SWENSON, LAS VEGAS, NEVADA 89109

#### SOURCE: PRESENT AND FUTURE SEVAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

The water to be used intially and primarily for Pollution Abatement/Power Production in any one and any or all combinations of the following methods, uses, and ways. Also listed are other additional incidental, secondary, and co-uses that may occur.

- 1) Nonconsumptive controlled dispersement of effluent water within the lower basin of Lake Mead 3 to 6 miles north of Las Vegas Bay and elsewhere to mitigate nutrient overload pollution in the Las Vegas Bay, provide nutrients for fishing enhauncement where needed, and preserve return flow credits as required and if accepted by Bureau of Reclamation
- 2) Hydroelectric power production with an approximate theoritical 1909.25 horsepower, increasing two to five percent per year.
- 3) Aquaculture and biomass treatment with limited or partial consumption.
- 4) Nonconsumptive and consumptive recreational uses to include but not limited to creating shaded walking trails and wildlife habitat expansion.
- 5) Minor consumption by fishing enhauncement thru dispersement, aquiculture, and hatchery systems.
- 6) Nonconsumptive or minimumally consumptive low cost copper/silver treatment for human and other harmful pathogenic.
- 7) Monconsumptive upper subsurface storage.
- 8) Monconsumptive or partially consumptive solar sterilation of effluent water.
- 9) Nonconsumptive and consumptive solar/thermo/electrical production.
- 10) Consumptive and partially consumptive agriculture uses so long as the water is not requested for or available for return flow credits by the Department of Interior, Bureau of Reclamation.

ATTACHMENT D

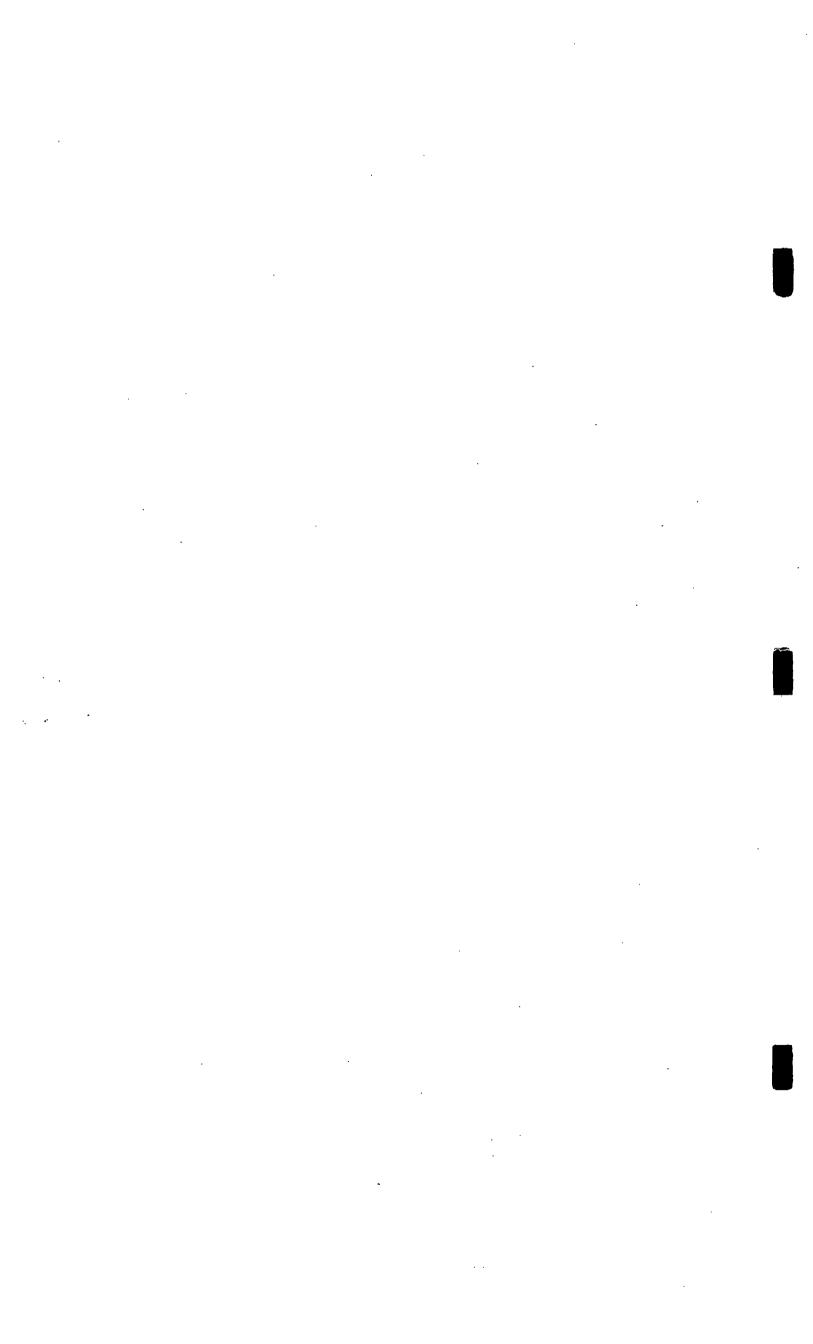

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA
BY LARRY G. LEWIS, 3955 SWENSON, LAS VEGAS, NEVADA 89109

SOURCE: PRESENT AND FUTURE SEVAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

#### Diversion point:

City of Las Vegas Wastewater Treatment Plant-at chlorination weir(s)-the Southwest Quarter (SE1/4) of the Southwest Quarter (SV1/4) of Section 10 Township 21 South, Range 62 East M.D.B. & M., or at a point from which the Southwest (SW) corner of said Section 10 bears South 80 degrees 00' West 1,910.00 feet as supported by the map submitted with application 21014-S-1 and other associated applications and appropriations. Additionally any future point that the effluent water is relocated to, modification of process creates a new discharge point, or discharge point of alternate facilities where the water is transferred to or processed at for treatment.

### ATTACHMENT E APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA BY LARRY G. LEWIS, 3955 SWENSON, LAS VEGAS, NEVADA 89109

### SOURCE: PRESENT AND FUTURE SEWAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

Place of use: (For Quanities as Described in Attachment B)

- A) (101.73001 cfs) The area of primary nonconsumptive pollution abating/power production use for this effluent water will be Sections 1-18, Townshiip 21S, Range 64E. Part of this nonconsumptive use may be in Sections 12 & 13, T21S, R63E, Sec. 13, T21, R63%E, Sec. 13-24 & 29-31, T21S, R65E. As the Bureau of Reclamation requires return flow the usage will become entirely in these areas. Prior to the Bureau of Reclamation's call for return flow some consumptive use may occur throughout T20S & T21S and R62E, R63E, R64E, and R65E.
- B) (37.648197 cfs) The uses and locations for use of this effluent water is the same as A) above with more emphasis on consumptive that can be discontunued about the year 2030 when or if it is needed to meet return flow needs.
- C) (282.48869 cfs) This nonpriority effluent will be used as in and at the locations described in A above with nore emphasis on financially affordable consumptive recreational and other benificial uses while still meeting pollution abatement needs.

ATTACHMENT F

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA
BY LARRY G. LEVIS, 3955 SWENSON, LAS VEGAS, NEVADA 89109

SOURCE: PRESENT AND FUTURE SEVAGE AND SLUDGE EFFLUENT WATERS OF THE CITY OF LAS VEGAS WASTE WATER TREATMENT PLANTS

Estimated cost of works: (For Quanities as Described in Attachment B)

- A): (101.73001 cfs) The current estimated cost of the system to abate the pollution of this effluent water is currently roughly estimated at \$7,500,000 of which approximately \$4,250,000 can be contributed to the City of Las Vegas flows.
- B) (37.648197 cfs) This additional water could be handled by an additional \$900,000 of work because the original project is anticipated to be oversized.
- C) (282.48869 cfs) The intial phase of usage of this water will be a minimum of \$500,000 additional expenditure of the projected expenditure of A above and will eventually exceed \$5,000,000.
